

ALUMINUM SECURITY WINDOWS

Defend tX's steel security doors are built for the most demanding environments where maximum strength and ballistic protection are essential. Manufactured with heavy-duty steel and available in full-slab and half-lite designs, these doors provide a durable solution for secure entryways, interior access points, and critical infrastructure. Designed for ballistic performance and long-term reliability, they integrate seamlessly with security walls and framing systems.

UL I-3

UL 4-8

KEY FEATURES
