GUARD SHACKS

Defend tX guard shack units are engineered to deliver ballistic-rated protection, comfort, and durability at critical access points. Each unit arrives fully assembled—featuring commercial HVAC, electrical wiring, and customizable options like sliding or swing doors. From compact single-operator booths to larger modular configurations, we offer scalable solutions designed to support access control, perimeter defense, and long-term security operations in high-risk environments.

KEY FEATURES

- Fully assembled and ready to deploy
- Ballistic-rated steel construction
- Ballistic glass windows for increased visibility and protection
- Commercial-grade HVAC system
- Electrical outlets and pre-installed wiring
- Low-maintenance design for long-term durability
- Customizable to meet specific operational needs

COMMON APPLICATIONS

- Facility entry and exit points
- Commercial and industrial site access control
- Stadiums and event venue access
- Parking enforcement and toll collection
- Distribution and logistics centers
- School and campus perimeter security
