HARDENED ENTRY CONTROL POINT SYSTEM - ECP-2

Support checkpoint operations with ballistic protection and separate controls for incoming and outgoing vehicles. The Defend tX Hardened Entry Control Point System brings together a ballistic guard booth, dual gate arms, fixed bollards, credential control, and entry lighting. Three booth sizes help accommodate staffing needs, with optional upgrades available to support your site's security requirements.

KEY FEATURES

- Ballistic steel guard booth with HVAC and electrical
- Two automatic gate arms for inbound and outbound traffic
- Four fixed M50-rated bollards
- Credential / card-reader system
- Entry lighting
- 4′ × 6′, 6′ × 8′, and 8′ × 12′ booth sizes
- Custom design options

OPTIONAL SECURITY UPGRADES

- Surveillance: Two exterior cameras, a network video recorder, and a security monitor
- License Plate Recognition: Identify and record vehicles approaching the checkpoint
- Perimeter Fencing: Connect the checkpoint with surrounding perimeter security
