HIGH SECURITY ENTRY CONTROL POINT SYSTEM - ECP-3

Bring vehicle denial and ballistic protection together at your facility entrance. The Defend tX High Security Entry Control Point System pairs a ballistic guard booth with an M50 vehicle barrier, fixed bollards, credential control, and security lighting. Available in three booth sizes, ECP-3 supports checkpoint operations at government, military, nuclear, and other critical infrastructure facilities.

KEY FEATURES

- UL 752 Level 8 / NIJ IV booth with HVAC and electrical
- M50-rated manual drop-and-swing vehicle barrier
- Fixed M50-rated protective bollards
- Badging / card-reader access control
- Enhanced security lighting
- Booth sizes: 4′ × 6′, 6′ × 8′, and 8′ × 12′
- Custom layouts and equipment options

OPTIONAL SECURITY UPGRADES

- Surveillance: Two exterior cameras, a network video recorder, and a security monitor
- License Plate Recognition: Identify and record vehicles approaching the checkpoint
- Perimeter Fencing: Connect the checkpoint with surrounding perimeter security
