STANDARD ENTRY CONTROL POINT SYSTEM - ECP-1

Manage vehicle access with a coordinated checkpoint package. The Defend tX Standard Entry Control Point System combines a steel guard booth, an automatic gate arm, credential control, and entry lighting. Available in three booth sizes, ECP-I gives security personnel a dedicated workspace while helping facilities manage employees, visitors, and deliveries.

KEY FEATURES

- Steel guard booth with commercial HVAC and electrical wiring
- One automatic gate arm for vehicle access control
- Credential reader for managing authorized entry
- Entry lighting for checkpoint visibility
- Three booth sizes: 4′ × 6′, 6′ × 8′, and 8′ × 12′
- Custom design options to accommodate site requirements

OPTIONAL SECURITY UPGRADES

- Surveillance: Two exterior cameras, a network video recorder, and a security monitor
- License Plate Recognition: Identify and record vehicles approaching the checkpoint
- Perimeter Fencing: Connect the checkpoint with surrounding perimeter security
